Berk-Tek Leviton Technologies to Showcase Premier Performance Systems at 2014 BICSI Winter Conference & Exhibition

Bothell, Washington, January 22, 2014 – Berk-Tek Leviton Technologies will exhibit the latest in cable and connectivity system solutions at the 2014 BICSI Winter Conference & Exposition in Orlando, Fla., from February 3-5. The Berk-Tek Leviton Technologies exhibit – located at booth #725 – will feature several complete, end-to-end solutions, including the new CX6800 Category 6A UTP system and the premium High-Density Fiber System.

CX6800 Category 6A UTP System: The Category 6A component-rated system delivers unparalleled 10G network performance and density, and is specifically tuned as an end-to-end system to optimally support 10GBASE-T applications. The innovative crosstalk prevention (XTP) technology in the LANmark™-XTP cable assures excellent alien crosstalk (AXT) suppression with industry leading channel margin guarantees. The LANmark-XTP cable requires no grounding and bonding, and the cable's small diameter improves density, optimizing airflow and cooling in congested data center pathways and space-constrained conduits.

High-Density Fiber System: The premium fiber optic cabling system combines Berk-Tek's Micro Data Center Plenum (MDP) cable with the Leviton Opt-X® HD Enclosure System. The solution reduces pathway fill, improves airflow and enables dramatically higher patching density in racks and cabinets for data centers and SAN installations.

Leviton Opt-X HD Enclosures provides up to 50 percent more density when used with MTP® connectors. Patented Berk-Tek MDP cable, when combined with MTP connectors, provides the highest-density backbone connectivity available, reducing pathway fill by up to 50 percent.

The combined strength of Leviton's connectivity and Berk-Tek's cables create the industry's premier copper and fiber end-to-end solutions. With uncompromised customer support, technology-driven products, quality-assured solutions and a limited lifetime warranty for qualified installations, Berk-Tek Leviton Technologies delivers the highest return on infrastructure investment (ROi™) available.

About Leviton Network Solutions

Leviton Network Solutions delivers complete network infrastructure systems for enterprise, data center, government, education, health care and residential markets around the globe. Solutions include copper and fiber optic connectivity, power distribution units, and much more. All Leviton products are engineered to exacting standards, offer industry-leading performance and are backed by the industry's best service and support. Builders, contractors and other industry professionals consistently rank Leviton products as the most preferred brand in the industry. Make the smart choice for a better network. Learn more at leviton.com/ns or twitter.com/LevitonNS.

About Leviton

Leviton is the smart choice, providing the most comprehensive range of solutions to meet the needs of today's residential, commercial and industrial buildings. Leveraging more than a century of experience, Leviton helps customers create sustainable, intelligent environments through its electrical wiring devices, network and data center connectivity solutions, and lighting energy management systems. From switches and receptacles, to daylight harvesting controls, networking systems, and equipment for charging electric vehicles, Leviton solutions help customers achieve savings in energy, time and cost, all while enhancing safety. For more information, visit www.leviton.com, <http://www.facebook.com/leviton>, <http://twitter.com/leviton> or <http://www.youtube.com/Levitonmfg>.

About Berk-Tek, A Nexans Company

For more than 50 years, Berk-Tek has been a leading manufacturer of more than 100 different network copper and fiber optic cable products. The company has led in the development of high-performance and enhanced fiber optic and UTP cables designed to transport high-speed data and voice transmissions. Berk-Tek has major manufacturing facilities at New Holland, PA, Fuquay-Varina, NC. For more information, visit www.berktek.com.

About Nexans

With energy at the basis of its development, Nexans, worldwide expert in the cable industry, offers an extensive range of cables and cabling solutions. The Group is a global player in the energy transmission and distribution, industry and building markets. Nexans addresses a wide series of market segments: from energy and telecom networks to energy resources (wind turbines, photovoltaic, oil and gas, and mining) to transportation (shipbuilding, aerospace, automotive and automation, and railways). Nexans is a responsible industrial company that regards sustainable development as integral to its global and operational strategy. Continuous innovation in products, solutions and services, employee development and commitment, customer orientation and the introduction of safe industrial processes with limited environmental impact are among the key initiatives that place Nexans at the core of a sustainable future. With an industrial presence in 40 countries and commercial activities worldwide, Nexans employs 25,000 people and had sales in 2012 of nearly 7.2 billion Euros. Nexans is listed on NYSE Euronext Paris, compartment A.
